## Abstract

The function `pds_hb()` represent the binary entropy.

## 1 Introduction

The function `pds_hb()` in the m-file `pds_hb.m` is defined as:

---

```
H = pds_hb(P);
```

---

This function represent the formulation of binary entropy  $H$  of probability  $P$ .

$$H = -P \log_2(P) - (1 - P) \log_2(1 - P) \quad (1)$$

This form is showed in [1].
